History

## OBJECTIVE

Proactive professional with 2+ years of experience in a work environment and a proven knowledge of problem solving through design. Actively expanding my skillset and aiming to leverage my skills to successfully fill a Software Developer role.

## WORK EXPERIENCE

### Freelance

Software Developer

(June 2020 - Present)

- Find and solve problems with software as a medium.
- Design and development of software with technologies like: Python, Node.js, MongoDB, React, HTML, CSS, JavaScript.

### CNR Architects CC

Architectural Technologist

(February 2019 - Present)

- Generate detailed design documentation of luxury hotels in countries like Greece, Vietnam, Seychelles and Saudi Arabia that are designed by Denniston.
- Solve architectural problems with the use of visualization, brainstorming via sketching and Autodesk Revit as the mediums.
- Maintain the basic Building Information Management (BIM) of the projects.
